

Product Recognition

Currently in use by United States Navy (Model 2500)

FEMA

Listed in US Fed Bid as authorized to be purchased by FEMA and other Emergency and Disaster based Government procurement centers

Independently evaluated by Kansas State University Food Safety System Research Department which confirmed the production of safe drinking water from Wataire's home/office atmospheric water generator

Wataire has received a NATO Commercial and Government Entity (NCAGE) code under "Emergency and Disaster Relief," making Wataire a certified NATO supplier

Wataire's 4010 units are being used by The Mars Society to provide safe drinking water for the 7-person crew comprised of scientists and engineers on a simulated 4 month Mars Mission

Wataire has received the coveted Green Apple Award for its technology from the UK. The 4010 was evaluated and reported as one of the most exciting and revolutionary products presented in years
